IN THE CLAIMS

Please amend claims 15, 20 and 23 as follows:

For the Examiner's convenience, all pending claims are included below.

15. (Amended Three Times) An update processing and transmission system, comprising: storage means for storing said status information relating to a commerce-related event; status information retrieval means for retrieving said status information from the common carrier information system and storing the status information in the storage means; message generation means for automatically generating a status message reflective of said status information; and

message forwarding means for automatically forwarding said status message to a point where it may be accessed by an interested party.

- 16. (Unchanged) The system of claim 15, wherein said status information relates to shipment of an item.
- 17. (Unchanged) The system of claim 15, wherein said status information retrieved by said status information retrieval means is contained on a second computer physically remote from a first computer on which said status information is stored and accessible via a network.
- 18. (Unchanged) The system of claim 15, wherein said status information is stored on a status information database within a first computer.
- 19. (Unchanged) The system of claim 15, further comprising a status information database for separately storing status information.

Ca

20. (Amended Three Times) An update processing and transmission method, including: receiving status information relating to a commerce-related event in response to a status query to a common carrier information system;

storing the status information in a status database relating to a commerce-related event;

retrieving said status information from the status database;
automatically generating a status message reflective of said status information; and
automatically forwarding said status message to a point where it may be accessed by
an interested party.

- 21. (Unchanged) The method of claim 20, wherein said status information relates to shipment of an item.
- 22. (Unchanged) The method of claim 20, wherein said status information retrieved is contained on a first computer physically remote from a second computer which stores the status information.

23. (Twice Amended) The method of claim 20, wherein said status information is stored on the status information database within a first computer.

24. (Unchanged) The method of claim 20, further comprising separately storing said status information.
